NEW ENGLISH DICTIONARY

In Four Volumes

Obsolete, foreign and slang words are only given place when need seemed to demand it. In the retention of slang words judgment has been exercised to select only those which have already become a part of the language or which promise to do so. A further saving of space has been accomplished by omitting the etymologies of rare, obsolete, and dialectic words. The arrangement of the definition is very convenient, and greatly promotes a quick fulfillment of the purpose for which a dictionary is made. The style of grouping is much better than that of any other dictionary
