Note:—The unit value of the capital and lower case alphabet is shown here for your convenience. The special Greek characters shown in the following specimen pages are the same unit values as those of the regular Greek alphabet. The superior and inferior capital and lower case characters are cast on unit rows wide enough to prevent any interference.

Consult the following pages of this specimen for all Greek characters available for Monotype Machine Typesetting. In ordering use the numbers shown to the left of the character; thus, if ordering Psi (Ψ) capital letter of 8 point No. 83M Greek Arrangement CI, the order should read 8 point No. 83M, character No. 23. This number would be the same for this character in all Greek Fonts, the only change in ordering would be the point size and the face number; thus, if 12 point No. 155M capital Psi (Ψ) were ordered, the order should read 12 point No. 155M, character No. 23.

Reference marks at foot of following specimen pages indicate matrices available from stock: \*155M; †160M; ‡83M; B-Superior Caps 155M; D-Inferior Caps 155M; C-Superior Lower Case 155M; E-Inferior Lower Case 155M. Class B Matrices.
